

Project 3: Mini - Ethnography

All in-class work, blog entires, and previous projects lead up to this project. In this paper, you will synthesize your fieldwork and integrate your research into a 10-12 page essay. You will attempt to answer your research question, and in the process you will try to answer the questions that have guided your fieldwork. Such as, 'What's the story?' and 'Where's the culture?' You will reevaluate your fieldwork, descriptions, interpretations, and analysis. Look through your in-classwork, blog entires, and box assignments; what questions did you have throughout the semester? How did you answer them? What questions didn't you answer and why? What did you learn from your site? What is interesting about your site? Finally, you will represent the subculture in which you have become a participant-observer and the informants you have come to know.

Requirements:

- MLA format (double spaced, titled, 12pt Times New Roman, 1in margins, Works Cited -- 10-12 sources)
- 10-12 pages.
